Summary

Aspiring Full Stack Software Developer pursuing B.Tech in Computer Science (AI/ML) with strong hands-on experience building MERN stack applications. Skilled in React.js, Node.js, Express.js, JavaScript, REST APIs, SQL, and Git/GitHub, with strong skills across relational and NoSQL databases (PostgreSQL, MySQL, MongoDB, Prisma ORM). Working knowledge of AI/ML tools including TensorFlow, PyTorch, scikit-learn, Pandas, NumPy, and Matplotlib.

Technical Skills

- **Languages:** JavaScript, TypeScript, SQL, C, C++
- **Frontend:** React.js, Redux, React Router, Tailwind CSS, Bootstrap, HTML5, CSS3
- **Backend:** Node.js, Express.js
- **Databases:** MongoDB, PostgreSQL, MySQL, Prisma ORM, SQLite
- **AI / Machine Learning:** TensorFlow, PyTorch, scikit-learn, Pandas, NumPy, Matplotlib
- **Tools & Platforms:** Git, GitHub, Postman, JWT, Vercel, Netlify, Firebase
- **Core Concepts:** Data Structures & Algorithms, RESTful API Design, Version Control, Full Stack Development

Experience

Self-Directed Full Stack Developer (MERN Stack)

2023 – Present

Personal & Freelance Projects

- Designed and developed full-stack web applications using MongoDB, Express.js, React.js, and Node.js, following RESTful API principles.
- Built responsive React applications reducing page load time by 35%.
- Implemented JWT authentication supporting secure login for multiple user roles.
- Integrated relational/NoSQL databases (PostgreSQL, MySQL, MongoDB) with Prisma ORM.
- Collaborated using Git and GitHub for version control, code reviews, and iterative feature development.
- Applied Python AI/ML libraries (TensorFlow, scikit-learn, Pandas, NumPy) to build data-driven features and predictive models.

Projects

MovieLand – IMDb-inspired MERN Movie Platform

github.com/bsjana007/movieLand
movieland-weld-iota.vercel.app

MERN Stack Web Application

- Built a full-stack movie and web-series discovery platform (similar to IMDb) using MongoDB, Express.js, React.js, and Node.js, with browsing, detailed descriptions, and season/episode exploration.
- Designed RESTful APIs to serve dynamic content and integrated a NoSQL database for flexible content management.

SyncWork – HRMS Platform

github.com/Kashcx-dev/_SyncWork_

JavaScript, Full Stack HR Management System

- Developed an integrated HRMS to replace fragmented spreadsheets and manual HR workflows, with secure employee onboarding, real-time attendance tracking, and automated leave management.
- Collaborated in a team environment using Git/GitHub for feature branching and code integration.

AI Weather Forecast Prediction System

github.com/bsjana007/weather-forecast

Python, Machine Learning

- Built a weather forecasting model using Random Forest Regression trained on 20,000+ historical weather records, achieving accurate 5-day temperature prediction.
- Processed and analyzed historical weather data to train predictive models and visualize trends using Matplotlib.

Education

Adamas University

B.Tech CSE AIML

Kolkata, West Bengal

2025–2029
