Summary

Full Stack Software Developer with 3 years of hands-on experience building scalable web applications using the MERN stack (MongoDB, Express.js, React.js, Node.js). Proficient in JavaScript, TypeScript, HTML5, CSS3, C, C++, SQL, and Git/GitHub, with strong skills across relational and NoSQL databases. Working knowledge of AI/ML tools including TensorFlow, PyTorch, scikit-learn, Pandas, and NumPy.

Technical Skills

- **Languages:** JavaScript, TypeScript, SQL, HTML5, CSS3, C, C++
- **Frontend:** React.js, Redux, React Router, Tailwind CSS, Bootstrap, Vite
- **Backend:** Node.js, Express.js, REST APIs, Socket.io, WebSockets, JWT Authentication
- **Databases:** MongoDB, PostgreSQL, MySQL, Prisma ORM, SQLite
- **AI / Machine Learning:** TensorFlow, PyTorch, scikit-learn, Pandas, NumPy, Matplotlib
- **Tools & Concepts:** Git, GitHub, Postman, Vercel, Netlify, Firebase, Supabase, Data Structures & Algorithms, RESTful API Design

Experience

Self-Directed Full Stack Developer (MERN Stack)

2023 – Present

Personal & Freelance Projects

- Designed and developed full-stack web applications using MongoDB, Express.js, React.js, and Node.js, following RESTful API principles.
- Built responsive, accessible user interfaces with React.js, HTML5, and CSS3, and implemented JWT authentication with relational/NoSQL databases (PostgreSQL, MySQL, MongoDB) via Prisma ORM.
- Applied Python AI/ML libraries (TensorFlow, scikit-learn, Pandas, NumPy) to build data-driven features and predictive models.

Projects

AyuScan – IoT Healthcare Monitoring Dashboard

github.com/devxbhabani/AyuScan

Python, React, ESP32, BLE/WebSockets, ML

- Built an IoT healthcare wearable and real-time monitoring dashboard streaming live ECG, heart rate, blood pressure, body temperature, and SpO2 data.
- Integrated ESP32 firmware with a Python backend and React frontend over BLE and WebSockets for low-latency biometric streaming.
- Implemented AI-assisted anomaly detection on incoming vital-sign streams to automatically flag irregular readings and surface early health alerts.

Restaurant POS & QR Ordering System

github.com/devxbhabani/Restaurant-POS-System

React, Node.js, Socket.io, MongoDB

- Developed a real-time, full-stack restaurant POS with secure QR-code menu ordering for contactless customer orders, plus a live kitchen display system using Socket.io for instant order synchronization.

Spendly – Automated Expense Tracker

github.com/devxbhabani/Spendly

JavaScript, Full Stack

- Engineered a zero-effort expense tracker for Indian digital payments that auto-ingests and categorizes PhonePe, Google Pay, and Paytm transactions.
- Built parsing logic for bank UPI alerts across multiple institutions (SBI, HDFC, ICICI, UCO) to deliver real-time spending insights.

MakeLyft – Enterprise Carpooling Platform

github.com/devxbhabani/makelyft

JavaScript, Full Stack

- Built a corporate carpooling platform enabling employees to find and share rides, coordinate journeys, track trips in real time, and manage secure payments.

Education

Adamas University

B.Tech CSE AIML
